QUESTIONS?

The JPARC: Coping with Change; Realizing Exceptional Potential

40

DoD Training Range Challenges

- ***“To properly prepare U.S. Forces for combat, DoD must train at ranges that encompass all the terrain, land cover, and climate conditions that military personnel and weapon systems may encounter during deployment..... sustaining these ranges is critical to ensuring readiness.”***

2008 Report to Congress on Sustainable Ranges, OSD

USD P&R

- **Trends Shaping Range Development and Sustainment:**
 - **Encroachment challenges to existing ranges**
 - **Limited/reduced funding**
 - **New platform training requirements (UAS, 5th Gen, net-centric, etc.)**
 - **Joint training doctrine: true joint interoperability demands mission rehearsals—tactical through operational levels of war**
 - **Electronic warfare capabilities....ours and our competitor's**

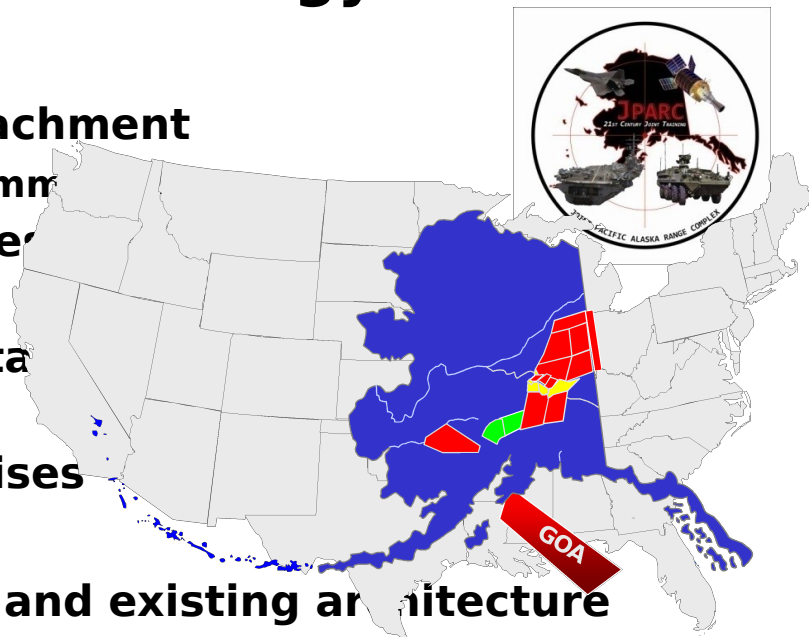

The Questions We're Asking

- **How is Alaska impacted by trends shaping range development and sustainment?**
- **What is the business model needed to achieve efficiencies and improved effectiveness across current Alaska capabilities, while also driving to a desired joint future?**

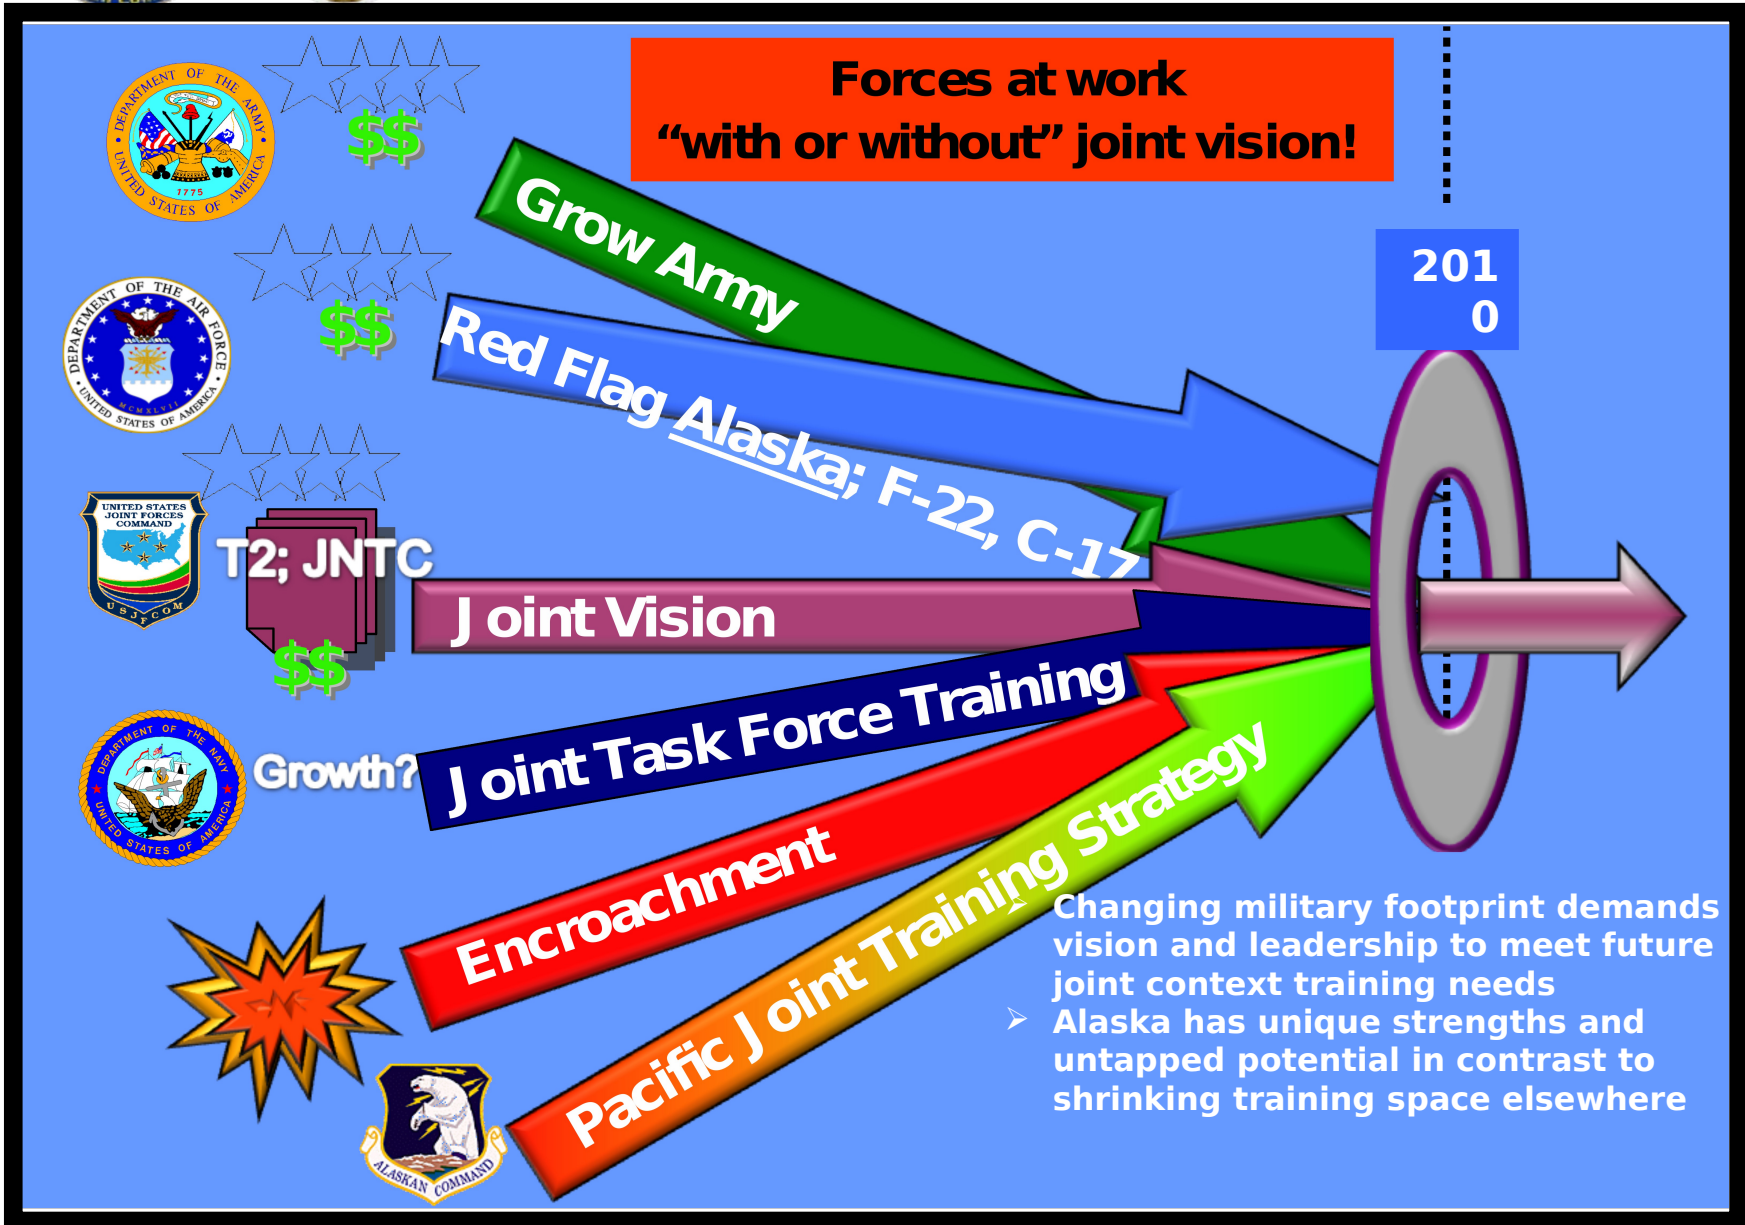

Why Alaska?

- **Alaska is a component of DoD's 21st century range development and sustainment strategy.....**
- **Compelling points:**
 - ✓ **Vast all domain capacity—little encroachment**
(environmental, commercial, host comm)
 - ✓ **Alaska-based Air Force and Army forces**
 - ✓ **Base infrastructure/Range instrumentation**
 - ✓ **Established joint and combined exercises**
 - ✓ **Live-virtual-constructive track record and existing architecture**
 - ✓ **“US soil” enables “US Only” vignettes—we maintain control of scenarios, but can play coalition too**
 - ✓ **Mainly Positive local/state environment for action—AMFAST = Alaska Military Force Advocacy & Structure Team**

Why Alaska Now?

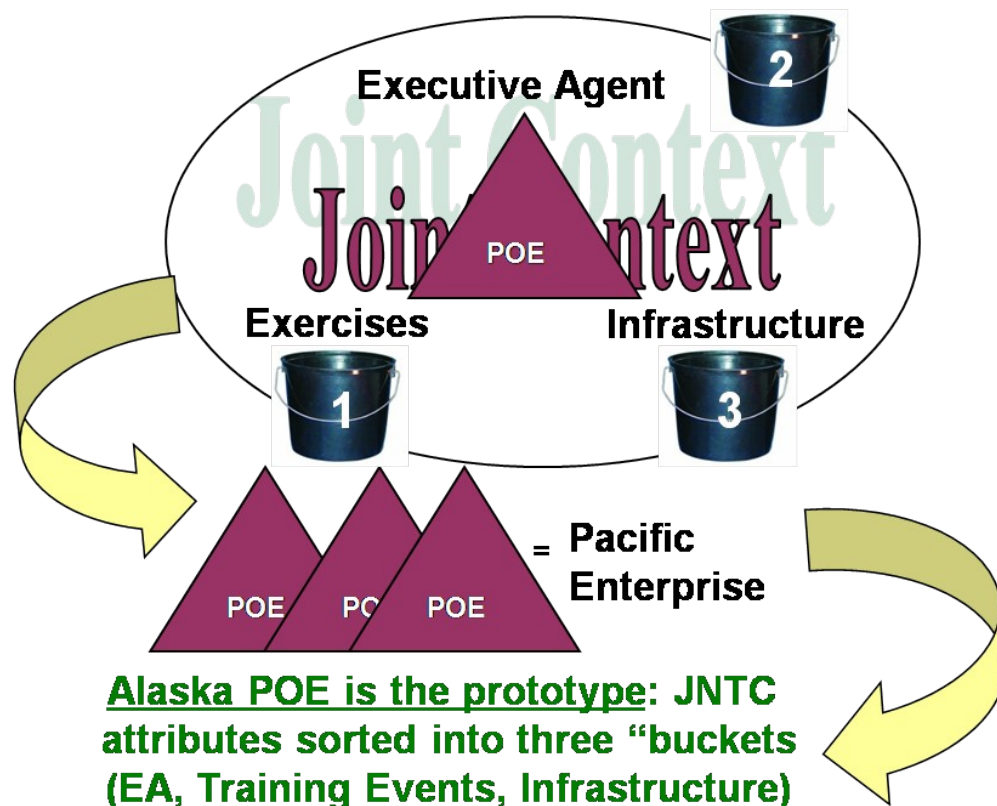

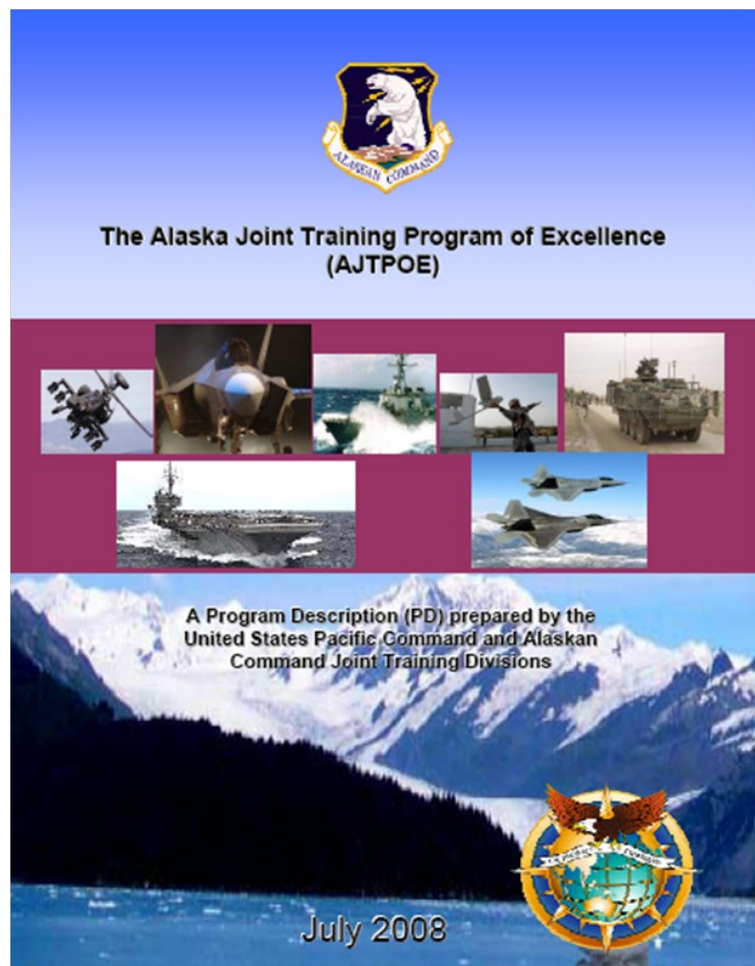

What We're Doing

- **Under US Pacific Command sponsorship, created the Alaska Joint Training Program of Excellence, with JPARC as its centerpiece**
 - **Accredited by JFCOM, December 2009 Report**
 - **A main focus is on USPACOM equities....warfighting capability gaps, war plan mission rehearsals**
- **Created an Alaska Joint Range Strategic Working Group**
 - **Bring Stakeholders together; get in front of conflict; seek joint synergies**
- **Seeking communications with federal, tribal, state, local, private interest groups**
- **A factor in the activation of Alaska Governor appointed Alaska Military Force Advocacy and Structure team (AMFAST)**
- **Gained funding for a comprehensive JPARC Environmental Impact Study (EIS).**

Alaska Joint Training Program of Excellence

- ✓ Target COCOM Capability Gaps (IPL)
- ✓ Conduct Mission Rehearsals
- ✓ JTEN Expansion
- ✓ LVC growth
- ✓ Joint Live Range Development

Alaska Joint Range Strategic Working Group

Yesterday

- Legacy Thinking:**
- Separate vectors
 - Funding
 - Requirements
 - Goals
 - Few COCOM equities
 - Missed opportunities
 - Un-foreseen conflict

Today

- Joint Vision:**
- Coordinate vectors
 - Represent COCOMs
 - Pursue joint funding
 - Anticipate opportunities
 - Seek synergy
 - Pre-empt conflict

Tomorrow?

- 21st Century Capability:**
- Live-Virtual-Constructive Tactical  Operational
 - Service MET to Joint context
 - Mission rehearsals
 - Leaders in creativity and joint process
 - Exploit Alaska's strengths

De-conflicted Ops and Training

Integrated Ops and Training

JPARC EIS

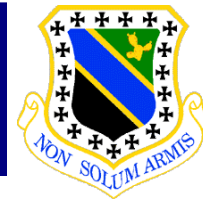

- **Requirements + Visioning + Strategies = JPARC Master Plan; unconstrained long term planning horizon; 1st draft June 2010**
- **Master Plan Captures both “Decision-ready” projects and future “Programmatic” projects**
- **Decision-ready projects are put forward for EIS consideration in the Description of Proposed Action and Alternatives (DOPAA)**
- **DOPAA “goes public” with formal government announcement in public register - Notice of Intent (NOI)**
- **Public Scoping is the process wherein DoD goes out to impacted communities to solicit their inputs/comments**
- **EIS process is federally mandated to be iterative work-in-progress; expected completion 2013**

Questions?

2010 Pattern Reset Briefing

Maj Katie Buss
3 OG/OGV

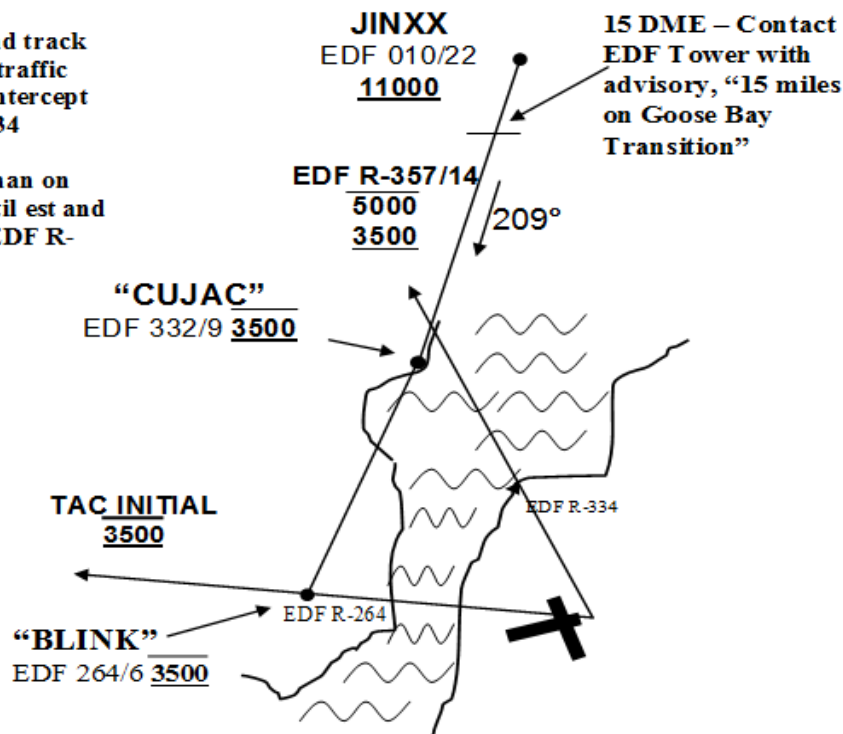

Goose Bay Transition*

Goose Bay Transition RADAR REQUIRED

Follow ground track to avoid dep traffic climbing to intercept the EDF R-334 outbound.
*Keep wingman on right side until est and inbound on EDF R-264.

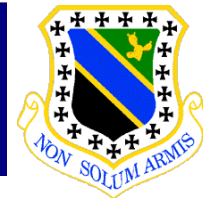

Notes:

- If you intend to land on Rwy 24,16 or 34, you will still proceed to Blink.
- **If not VMC by EDF R-357/14**: notify approach, proceed to CUJAC. At CUJAC, fly heading 240° and expect vectors. **DO NOT** cancel IFR and proceed direct initial.
- **If Wx < 4000/5**: request "vectors ILS" or "ILS Gnd Track" on initial contact with Anch Appch. Expect a SW vector and descent near JINXX.
- Request the 14 DME restriction be deleted if unable due to wx or wingman considerations.

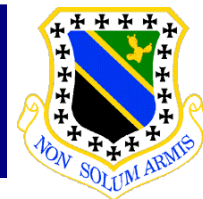

LOST COMM:

- **VFR**: Proceed to Rwy 06 via Blink. Rock wings on initial and land with a green light from tower.
- **IMC**: SQUAWK 7600. At CUJAC fly heading 240° and join the EDF 18 DME Arc west of EDF. Arc south and join the EDF R-239 to KNOBE. Cross KNOBE at or above 2200 and execute ILS Y or TACAN Rwy 06 approach.

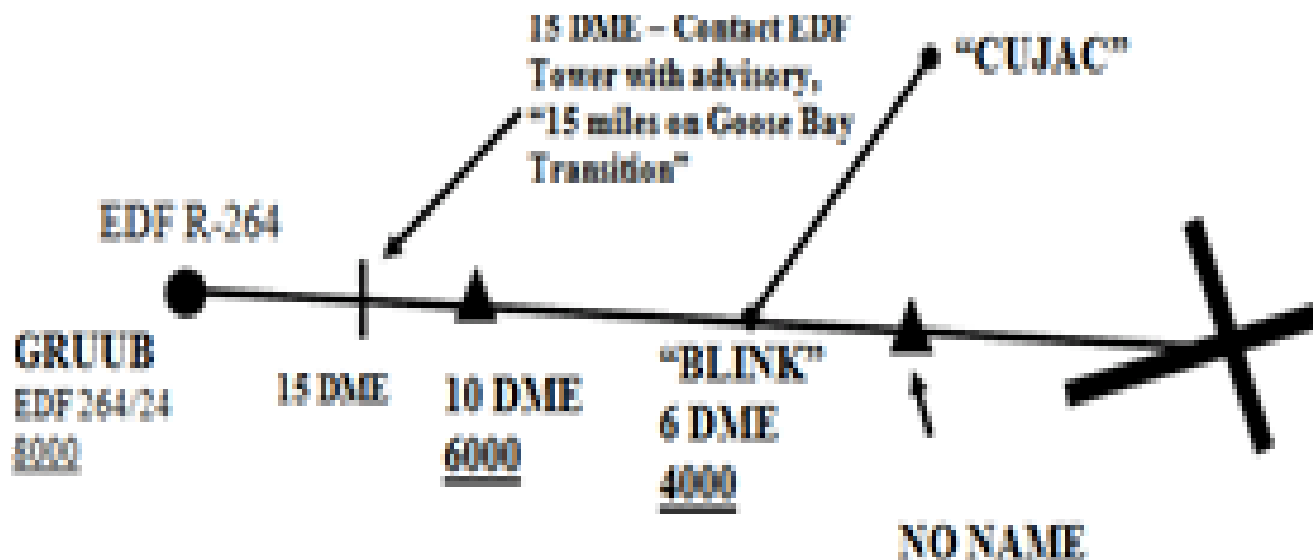

No-Name Transition to Tac Initial*

- Defines “BLINK” = West VFR Entry Point

Required: 4000' MSL/3NM; once "visual with the field" is declared, visual flight rules apply. If 500' separation exists between Goose Bay and Deska traffic. DESKA TRAFFIC: Delay descent to 3500' until in channel. Always verify clearance below prior to descent.

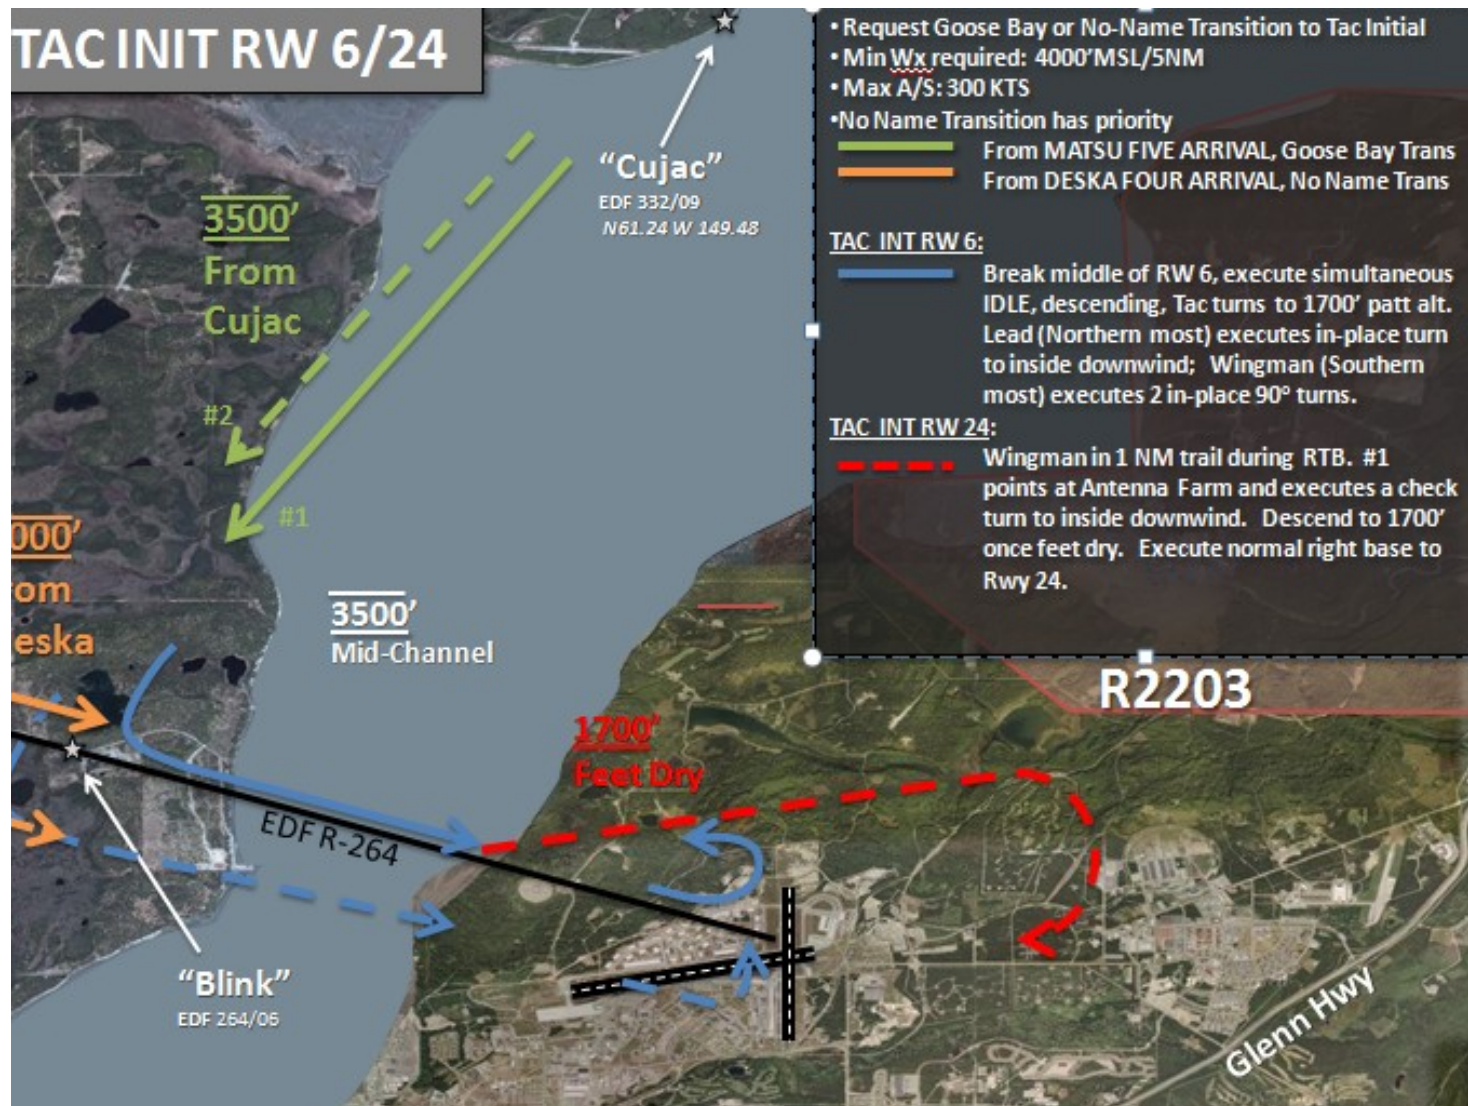

Lost Comm:

- VMC: Rock wings on Initial and land with a green light from tower.
- IMC: Squawk 7600 – at 0.6 DME, turn left direct HOBBS (EDF 304/13) at 3000' MSL and execute ILS Y TACAN Rwy 06 approach.

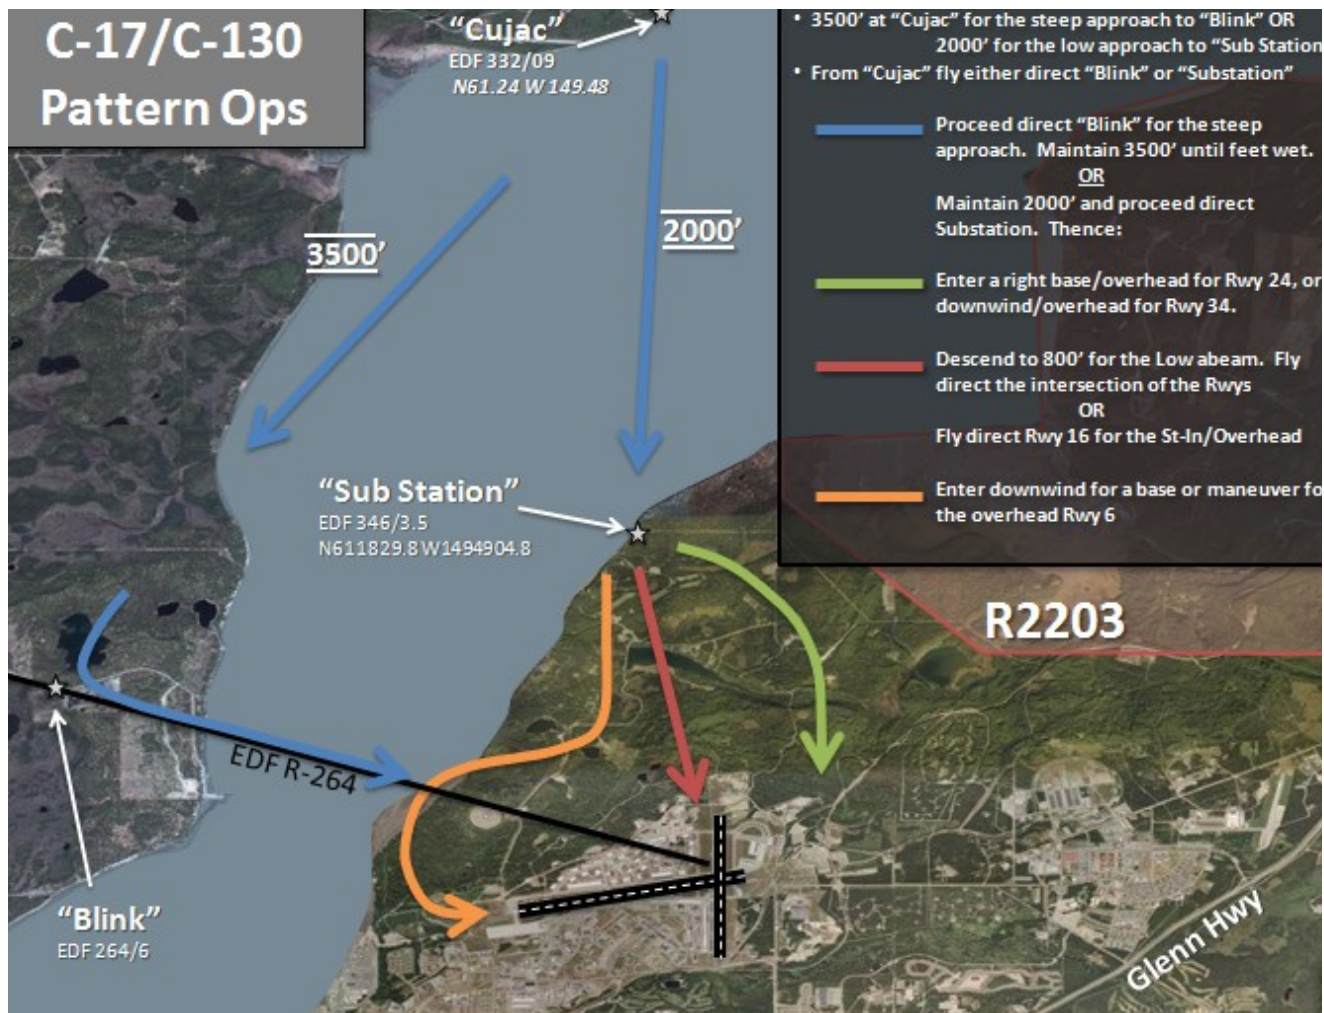

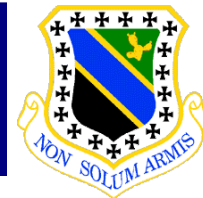

Fighters*

Tac Initial Rwy 6 & 24 @ 3,500' MSL

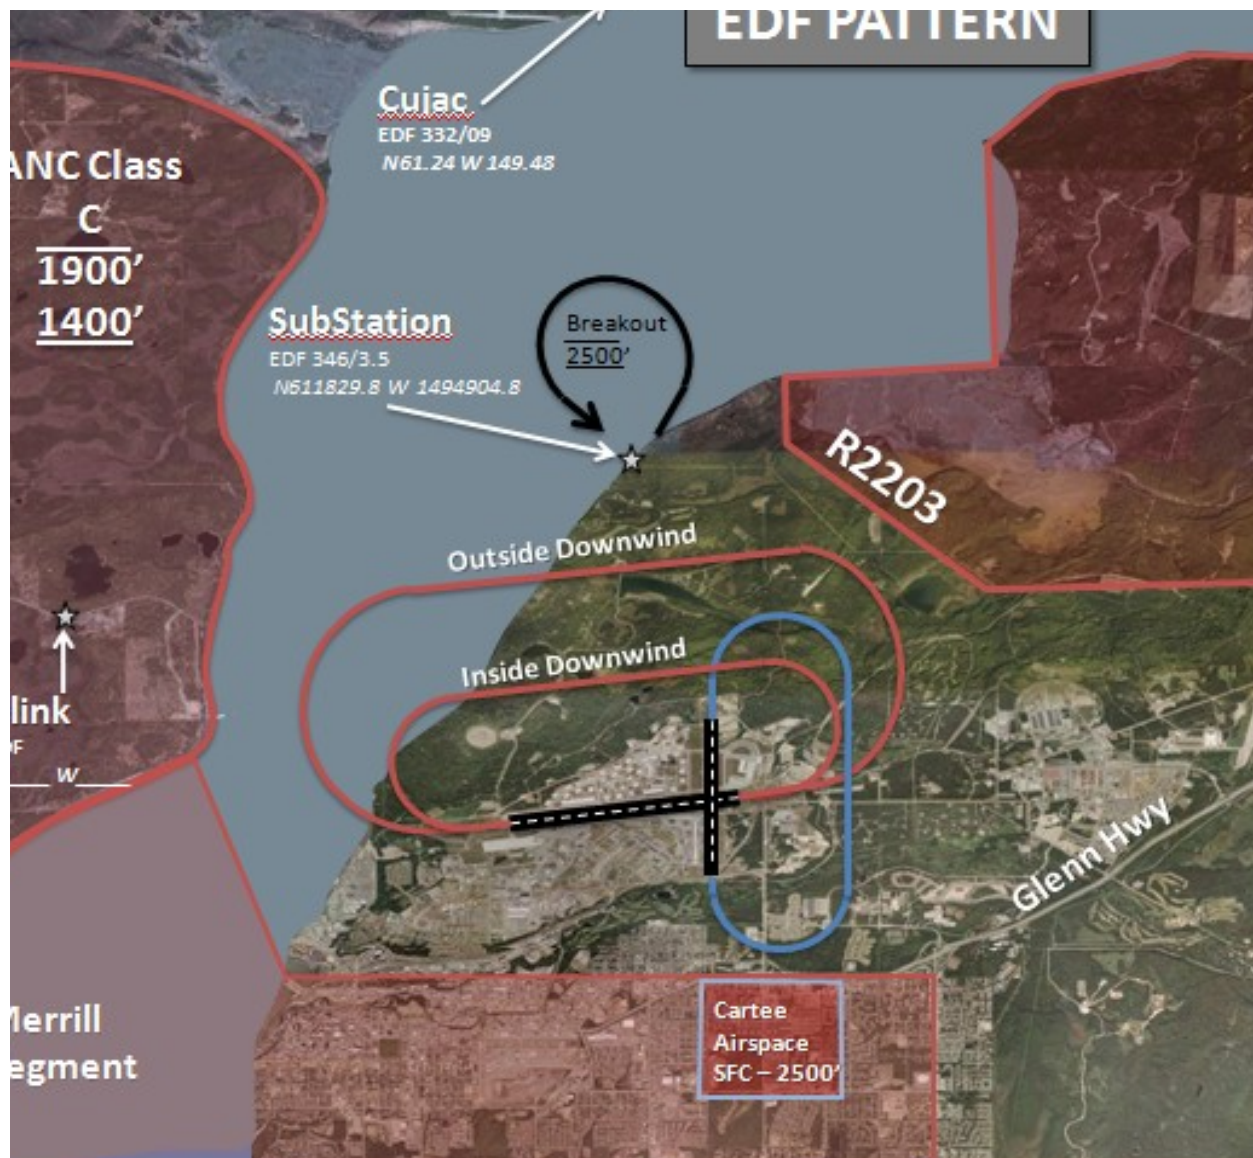

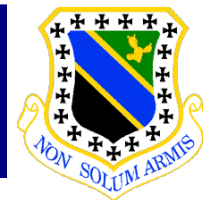

C-17 & C-130 Pattern Ops*

Elmendorf Pattern*

Major Force Exercise Scheduling

- **Why have exercise during sheep season opening?**
- **Current scheduling restrictions:**
 - **No Jan, Sep, Dec (per EIS)**
 - **Short days = no Oct - Feb**
 - **2 weeks between exercises**
 - **Not for 2 weeks around 4 July**
 - **Extensive no-fly zones over rivers, caribou, and sheep**
- **Scheduling team at Pentagon took request for 10 Aug**
- **Process plans for 3-4 years ahead**

Sub-ACMAC Update

■ Sub-ACMAC

- Committee to address/develop solutions to specific, high interest issues
- JPARC EIS notice of intent - early November
- Sub-ACMAC planned for early December 2010
- VTC between North and South Sub-Committees

SUAIS REMINDER

- **Special Use Airspace Information System**
- **Always manned when Mil flyers in SUA**
- **Recorded message other times**
- **Near-real-time info on Mil aircraft**
- **Call before you fly 800-758-8723**
- **Call when you fly 125.3**
